ABOUT BEN

Ben Jarrell was born in Dothan, Alabama, and raised on its outskirts. If you were to write out the story of Jarrell's journey, it would read like the content of a country song - a damn good one, too, complete with the well-worn themes of love, loss, and redemption.

Perhaps that's why Jarrell's musical leanings have always skewed towards country music and the legends who helped build and uphold the traditions of the genre; from George Jones, Johnny Paycheck, and John Prine to The Allman Brothers and Lynyrd Skynyrd to contemporary acts like Blackberry Smoke and The Steeldrivers.

Jarrell studied these songwriters, these bands, and their records. He took what he learned and applied it well. He created his first band. Then another. And another. He kept going until he got it right. He spun well-told stories in tightly wrapped chords. He toiled and tinkered and gave us a self-titled acoustic EP in 2018. That was followed by his full-length record, "Troubled Times" in 2019 - recorded with an all-star band at Southern Ground in Nashville, TN.

Then came 2021's "Up and Headed West," recorded in his home state of Alabama at the Alabama Sound Company. A record full of lyric-driven ballads and bangers with plenty of pedal steel to go around. "Up and Headed West" garnered attention & praise from country music outlets, earning spots on several "best albums of 2021" lists.

"These songs should be played loud and often whether in person or on the jukebox at your local saloon."

-SOUND CHECK ENTERTAINMENT (LIVE SHOW REVIEW)

"It's the kind of 70's cool a lot of the hipster kids in country music try to emulate these days, but colossally fail at when compared side by side to what The Ben Jarrell Band is throwing down here."
